Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 edition. Excerpt: .fact which, no doubt, is to be accounted for by the greater degree of cohesion existing between the shreds and particles of the peaty substance, when, indeed in proportion as, the cellular structure has become destroyed.-t With a view to exhibiting the shrinkage which different qualities of peat undergo, two specimens were taken from Emlagh Bog some three miles west of Roscommon, one 3 feet from the surface--a light brown turf; the other 12 feet from the surface---dark brown; each specimen was made cubical in form, and contained 43-6 cubic inches; and each was weighed in the state of saturation in which it came from the pit, and set to Ecoiomic Proceedings, Royal Dublin Society, No. 1. 1-A writer in the Fqmiera Gazelle for January 26th, 1895, attributed the shrinkage of peat in drying to the gum-like substance pertaae, which, the writer stated, not only causes shrinkage, hut promotes drying, bv squeezing 1.110 wage, from tlge interior to the surface. It is difliciiilt to conceive how such an effect could e produced by the extremely small proportionate quantity of poctase existing in peat. ECONOMIC APPLICATIONS or PEAT. 157 dry. The results, after twelve days drying at 80 F., are given in the following table: --The extensive use of peat as a fuel in Ireland justifies some notice of it in this regard, especially in view of the probability that it may come into more general use, in the compressed form, and thus become a valuable...
