Both services are currently developing and testing the systems that will form the bedrock of America s future theater missile defense, TMD, architecture. Once deployed, these systems will fill a gap in America s defensive capabilities that has existed for far too long. Since the Persian Gulf war, the need for effective theater missile defenses has become increasingly obvious. Without these capabilities, even relatively minor military powers will be able to inhibit and undermine America s ability to project power and maintain forward presence. As the threat has
