

Memoirs of the Connecticut Academy of Arts Sciences Volume 2

By Connecticut Academy of Sciences

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: .four free vertebrae to have persisted. SACRUM AND PELVIS. The preservation of the sacrum and pelvis of the type of *P. ingens* Marsh, No. 1175, is remarkable, displaying to advantage the principal characters of these important skeletal parts. Plate X exhibits the slightly distorted form of this specimen, while restored diagrams have also been prepared to show the side, top, and bottom views, respectively (Plate XI, figures 1, 2, and 3). Ten vertebrae firmly ankylosed together constitute the sacral series, using this term in its broader sense--the synsacrum of Professor T. J. Parker. The entire length of the inflexible column so formed is 184 mm. The extremities of the neural spines of all these vertebrae are united by a continuous median longitudinal band about 9 mm wide and about 6 mm in vertical depth. In general form, the three anterior members of this series are similar...
